

Unit:	RIIHAN308F - Load and unload plant
Price:	Price on application
Duration:	1 day
Location:	Our venue, or your worksite for groups (please ask for a quote)
Pre-requisites:	Identification, adequate literacy & numeracy and USI.

This unit describes a participant's skills and knowledge required to load and unload plant in the Resources and Infrastructure Industries. This unit is proper for those working in operational roles.

Course Delivery

A learner guide and review questions will be provided to the student prior to course commencement. To fulfil the training requirements for this course, the student must read through this, complete the review questions and bring both with them on the day.

The course consists of face-to-face theory and practical training.

Assessment is conducted through a combination of practical demonstration and verbal or written questioning.

Course Content

- Relevant Australian Standards, Legislation, and Regulations
- WH&S policy
- Codes of Practice
- Manufacturers specifications and instructions
- Hazard Identification and hazard prevention
- Plan and prepare to load and unload plant
- Load the plant
- Unload the plant

Course Requirements

- Appropriate clothing, including a hi-visibility shirt/vest and enclosed shoes or boots
- Adequate health and fitness to carry out tasks safely
- Meet all pre-requisites listed.

Course Fees

All enrolments are considered tentative until payment has been received.

Course Outcome

Upon successful completion participants will receive a Nationally Recognised Statement of Attainment in *RIIHAN308F - Load and unload plant*.
